Ch Echomidi Struttin His Stuff GD SD RN (Yardie) and Ch Neut Ch Cooroorah Cozican RN ADM6 JDM3 GDX SPDX SDX ADO4 JDO5 CCD (Tulip)

Breed: Australian Cattle Dogs

Breeders: Tony and Kerrie Carlson, Childers, Qld and Tanya Reichstein, Palmerston, NT

Owner: Tanya Reichstein – Echomidi Kennels

After losing Schooner in December 2021 the blue kids of Team Echomidi really stepped it up in the competition ring in 2022. Although Yardi (Ch Echomidi Struttin His Stuff GD SD RN - by Ch Neut Ch Cooroorah Catchmeifyoucan CCD RAE ADO2 ADM JDM JDO2 SPD GDX SDX ex Ch Neut Ch Cooroorah Cozican RN ADM6 JDM3 GDX SPDX SDX ADO4 JDO5 CCD), had to stop competing in July 2022 due to injury, I did manage to get him out into the competition arena in August and October 2022, which was just enough for him to obtain three (3) super qualifications and gain his Rally Novice title. This was my very first obedience title for my kennel. So proud to announce that my darling Yardie can now be known as Ch Echomidi Struttin His Stuff GD SD RN.

Tulip (Ch Neut Ch Cooroorah Cozican RN ADM6 JDM3 GDX SPDX SDX ADO4 JDO5 CCD - by CH Benidboi Gotta Be Mine ex Ch Cooroorah Diamond Solataire) has been a superstar in the agility ring and she also picked up some very competitive Neuter in Show wins this year. I am thrilled to bits as she currently has an amazing thirty-two (32) titles to her name now! I am hoping she can come back next year as she turns 10 years old in January – so my fingers are crossed!

She requires just three (3) more Masters Jumping (in 1st place) for the elusive Agility Champion title, so we are working on her fitness and hoping we can gain that title in 2023. She has now amassed nine hundred (900) points on the agility side only requires 500, so to get the next seventy-five (75) points in Masters Jumping is our aim and then she will retire. Tulip gained the following titles in 2022: ADO4, JDO5, JDM3, ADM4, ADM5 and ADM6 qualifying twenty-five (25) times in the trial ring this year!

Thank you very much to the blue mofos for all the love and support they continue to give me - they have been my rock.

Yardie and Tulip are owned, campaigned and loved by Tanya Reichstien

Department of Industry, Tourism and Trade

Ehrlichiosis

THE
TERRITORY

Treatment for your dog

Ehrlichiosis, a tick-borne dog disease, has been detected in the Northern Territory and is present in all areas, including Darwin, Palmerston, Katherine, Tennant Creek, Alice Springs and remote communities.

Ehrlichiosis is a bacterial disease spread by the brown dog tick. If your dog has been diagnosed with ehrlichiosis, it is important that you follow some simple measures to protect the health of your dog and your community.

Treatment Plan

- Follow the ehrlichiosis treatment plan recommended by your vet.
- Complete the long course of antibiotics prescribed by your vet.

Early antibiotic treatment provides the best chance of recovery. In some cases very sick dogs may need supportive care and hospitalisation.

Tick prevention program

- Have your dogs on a tick control program. Tick collars and spot-ons are the best primary protection used in combination with tablets and chews registered for tick control. Treat all the dogs at the same time.

Talk to your vet about which product is best suited to your needs.

You should always:

- follow label instructions
- provide regular treatments on time – a reminder in your phone can help!

Check your dog for ticks

- Regularly check your dogs for ticks.
- Run your fingers through your pet's coat, feeling for ticks that may be attached to the skin. Pay particular attention to the head, neck and ears, chest, between their toes and around their mouths and gums.
- Kill the tick by putting it in alcohol, into a sealed container and then into the rubbish.

 Join the Biosecurity Facebook Group @biosecNT
nt.gov.au/ehrlichiosis

Official Notices

Treating your environment

- Speak with a professional pest controller about treating your home environment to break the cycle of infection.

Ticks can live in cracks and crevices around your house and yard, around kennels, and inside skirting boards, window and door frames where they can survive for many months without feeding.

Ticks that feed on an infected dog can go on to infect other dogs. Controlling ticks in your environment is important to break the transmission cycle of the disease.

Don't move your dog

- Don't move your dog away from your hometown or community until it is recovered, as this could spread disease to other areas.
- If you need to move your dog(s), wait until its treatment is finished. Contact your vet to check your dog is healthy and ensure your tick control treatment is current.

Look out for the signs

- If any other dogs become unwell, especially with fever, lethargy, loss of appetite, weight loss, cloudy eyes or conjunctivitis, pain and stiffness, bleeding disorders such as nosebleeds or bruising on the gums or belly, contact your vet immediately so they can be checked for ehrlichiosis.

Human health

- The disease cannot be directly passed from infected dogs to humans.
- In extremely rare cases, ticks infected with *Ehrlichia canis* may infect people. Human ehrlichiosis is almost always caused by species other than *Ehrlichia canis* and these species have not yet been found in Australia.
- For information on human health implications associated with ticks, as well as prevention, removal and first aid advice see [www2.health.wa.gov.au/en/Articles/S T /Ticks](http://www2.health.wa.gov.au/en/Articles/S_T/Ticks)

Ehrlichiosis

It is important to seek veterinary advice and treatment as ehrlichiosis can resemble other tick-borne dog diseases. Early treatment provides the best chance of recovery.

If you suspect your dog is showing signs of the disease, consult your local vet for further advice about diagnosis and treatment.

More information about ehrlichiosis can be found at nt.gov.au/ehrlichiosis

nt.gov.au/ehrlichiosis
